☐ Egg Freezing ☐ Infertility Consultation ☐ Semen Analysis
☐ Pre-implantation Genetic Screening ☐ Ovarian Reserve Testing
☐ Sperm Freezing ☐ Hysterosalpingogram (HSG) - See Back Page

Comments:

SEMEN ANALYSIS COLLECTION PROCEDURE

1. We conduct semen analysis by appointment ONLY at our Medical Center Office, Monday–Friday, 7:30–9AM if sample is collected at home or 9–11AM if collected at our Medical Center location. The cost for the analysis is $95.00. Please bring this form with you to your appointment.

2. Payment is due at the time of service and can be made by check, cash or credit card. There is no insurance billing for the semen analysis.

3. Our lab recommends 3-4 days of abstinence prior to collecting your sample. This is very important as longer or shorter periods of abstinence can affect test results adversely. If an appointment is not cancelled at least 24 hours in advance, you will be charged a $50.00 fee.

4. The sample is collected by ejaculating directly into the specimen container provided. We are pleased to provide a sterile specimen container if needed. Any type of lubricant is prohibited. It is important that the entire sample be collected. For this reason, interrupted intercourse is unacceptable.

5. It is **REQUIRED** that the **MALE PATIENT** presents the sample in person along with a photo ID.

6. Full Name: _____
   Your Partner's Full name: _____
   Time of Collection: _____
   # of Days Abstinent: _____

7. Samples can be collected in our facility or brought to the lab within 1 hour of collection. It is preferred that motility be evaluated within 30 minutes of collection. Protect the sample from extreme heat or cold. If you live out of town, or cannot reach the lab within ½ hour – 1 hour after collecting the specimen, please let us know so that special arrangements can be made.

8. Please allow 72 hours for your results to be sent to your referring physician and you may contact their office for the results. If you have any questions, please feel free to call the lab at (210) 692-0577.

Relationship to Patient: _____

HSG PATIENT INSTRUCTIONS:

- Please call our office at 210-692-0577 on the first day of your period (cycle day #1) to schedule your HSG exam.
- HSGs are done on cycle days #5–11 but your period must have ended. If your period starts on a weekend, please call the next business day.
- This test SHOULD NOT be performed if there is any chance that you are pregnant.
- Please inform us prior to scheduling the procedure if you have had a previous allergic reaction to iodinated contrast. In that case, we may not recommend a clinic-based HSG procedure for you.
- We recommend taking 800mg of Ibuprofen/Motrin 1–2 hours in advance of the study to help alleviate any cramping that may occur with the study.
- We will send a report of your HSG results back to your referring Obstetrician/Gynecologist, and initial findings will be reviewed with you at the time of the study by the Fertility Center of San Antonio physician performing your exam.
